# NATURAL WINES

Natural Wine is farmed organically (biodynamically, using permaculture or the like) and made (or rather transformed) without adding or removing anything in the cellar.

No additives or processing aids are used, and 'intervention' in the naturally occurring fermentation process is kept to a minimum.

Organic wine does have yeast added into it during fermentation, while natural wine does not. The wines labeled "made from organic grapes" means that the wine produced organically; however it may still have added sulfites.

---

Orange wine, also known as skin-contact white wine, skin-fermented white wine, or amber wine, is a type of wine made from white wine grapes where the grape skins are not removed, as in typical white wine production, and stay in contact with the juice for days or even months.
